

# FALL IN LOVE WITH KPVG

## Welcome to the Team!

**Grover Meredith retired from the Navy in 2001 after 20 years as a Torpedoman Mate. He then served over 12 years as a civilian Plane Captain at NAS Oceana. He joined KPVG in April as our Fuel Line Technician.**

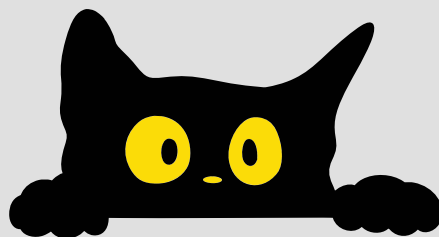

**Catherine Flowers retired from the Navy in 2011 after 20 years as an Aviation Engine Mechanic. She then served over 9 years as a civilian Plane Captain at NAS Oceana. She joined KPVG in August as our fuel Line Technician.**

## Save the Date! Saturday, November 2, 2024

KPVG antique Aircrafts and Antique Cars Show

All Tenants and guests invited to attend,  
Please contact KPVG at 757-465-0260 for more information.

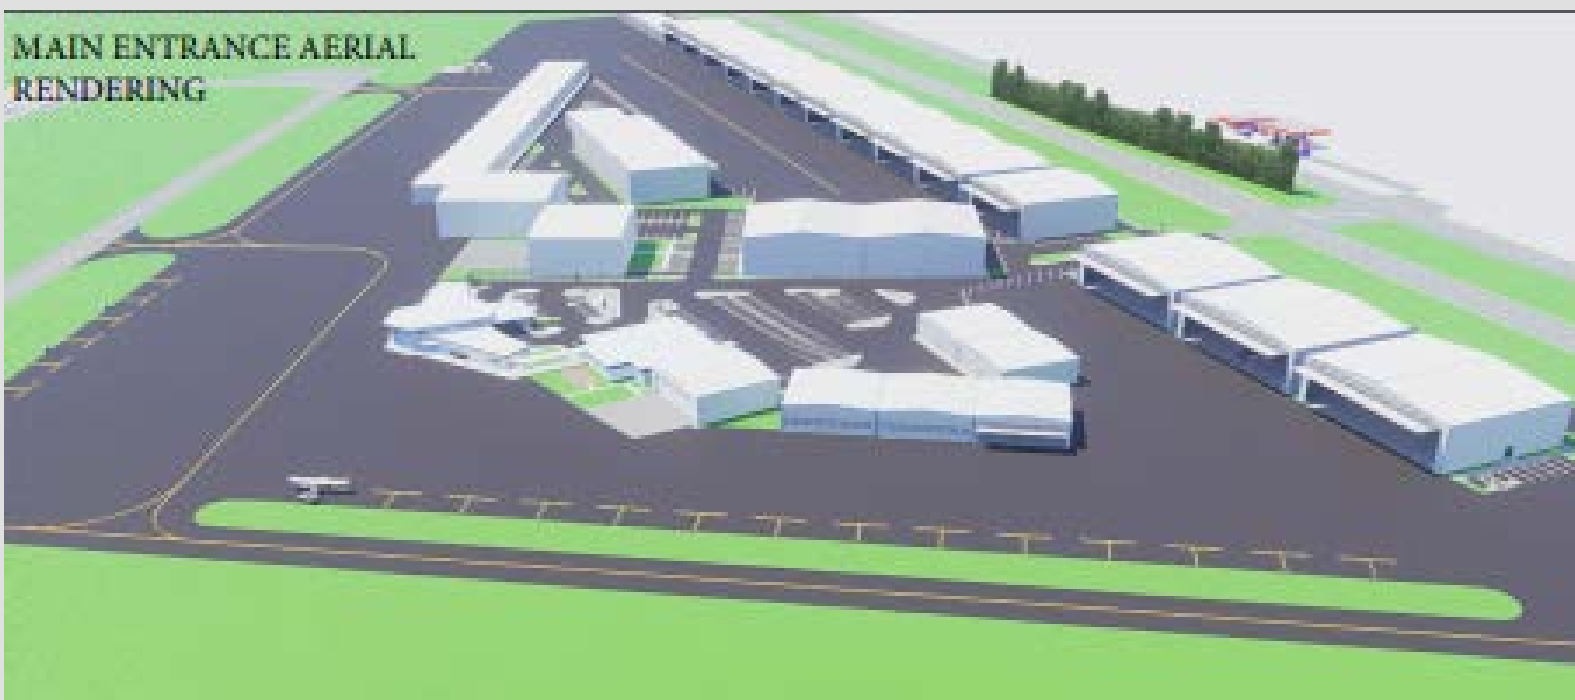

## *KPVG Continues to grow!*

The Main Entrance West Hangar Site will include three (3) new 12,000SF corporate aircraft hangars, each will be 120' wide x 100' deep with 100'W x 24'H one-piece hydraulic hangar doors facing a brand new ramp/apron which will connect to freshly paved taxiways. Each building will include a 14' W x 16'H motor operated overhead/garage door, a "storefront" glass double door, and multiple single-doors for ease of access. Located immediately on the west side of the Airport's main entrance, a new service road will provide drive access to the front side of each hangar as well as dedicated parking and automatic vehicle gate access to the ramp. Site work began on August 26, 2024 and is expected to be finished in April of 2025.

MAIN ENTRANCE AERIAL  
RENDERING

**The South Terminal Apron Rehab project will provide new asphalt, drainage, pavement markings, and tie-downs for the apron and taxiways extending south from the Airport's terminal apron. The construction elements include erosion control, pavement milling, full depth reclamation, grade correction, paving operations, site stabilization, and pavement marking operations. The South Terminal Apron Rehab project will provide brand new asphalt for the taxiways to and from the Main Entrance West Hangar Site as well as brand new asphalt for the Airport's terminal apron where transient aircraft park as well improved drainage and new tie-downs. This project began on August 5, 2024 and is expected to be completed in November of 2024.**

[Both projects are on track and progressing well](#)
